

Legend Rehabilitation

Dr. Daniel Ku

Sir, Let me express our extreme gratitude for all the help you have given to us as your patients.

We highly recommend you to everyone we know with confidence knowing what you have done for us which I would like to list.

Acid Reflux

Irregularity

Headaches

The inability to bend toes for over 20 years

Body pain from head to toe 24/7 which mimicked Fibromyalgia.

Leg cramping so sever it would wake my wife in tears.

Let me state we have gone to many doctors and specialist for help on the above issues and spent a lot of money for test. Although they all did the very best they could they were not able to address any of these issues with any success. Some of the above health issues my wife has had for 20 to 30 years.

Since we have become a patient of yours for the last 3 or 4 months you have addressed each health issue with EXTREME SUCCESS.

My wife is now down to once a week taking nexium for her acid reflux, you have addressed and rectified her irregularity, she no longer suffers with headaches, she can now bend her toes, which I never thought I would ever see and her body pain is GONE, I consider what you have done for her nothing short of a miracle.

Daniel, all too many times greatness is not appreciated and what you have done for my wife I truly consider a Great Service.

A Very Grateful and Sincere Husband

*A Chiefti*
