

Journey of My Healing

Tell us in your own words about your experience here. Be sure to include activities you had trouble with before acupuncture/physical therapy compared to how you are doing now.

Before I came to Dr. Ku, I had a severe pain in my head, on top of my skull and on the bottom of skull. I could not turn left; right; down or up. Very painful. Dr. Ku started massaging my neck and helped me, while holding my neck; turn to the left and turn to the right. At first I could hardly turn.

After several treatments I could turn my head and look down and up. The pain subsided quite a bit. And I can sleep at nights, at last.
